WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

- Two low pressure systems will affect the area through mid week, ridging and inside sliders should follow.
- Gusty S-SW wind through Tuesday, peak winds this afternoon 30-40 mph and locally higher favoring Shasta Valley and areas along and east of the Cascade-Sierra Crest.
- Potential for dry gusty N-NE and eventually E wind late week into following weekend.
- Accumulating precipitation likely this afternoon through am Sunday for areas NW of a line from Petaluma-Red Bluff-Lava Beds National
 Monument. Isolated thunderstorms possible NW quarter of the region. Totals 0.25 to 0.75 inches, with isolated 1.0" NW mountains/North Coast.
- Another round of accumulating precipitation possible Monday night through Tuesday night. Confidence is lower for amounts and favored areas.
- Higher relative humidity (RH) and cooler than normal temperatures through Thursday, much drier and warmer Friday into the following weekend.
- · Confidence moderate to high for the late week-next weekend dry-windy period.

SOUTHERN CALIFORNIA

An area of low pressure will move inland over Northern California today. Another low pressure will approach the California Coast starting Sunday and move inland over Southern California Wednesday. Some moisture from the remnants of Hurricane Rosa may get entrained into this second low pressure area. A couple of troughs will drop south out of Canada into California late next week.

- There will be south to west winds of 15 to 25 mph with gusts to 40 mph across the wind prone mountain and desert areas through Tuesday night.
- Temperatures will be near to a little below normal through Monday, with mid 60s to mid 70s across the mountains and upper 70s and 80s in the valleys.
- Minimum humidity will be mainly between 20% and 40% away from the coastal areas through Monday.
- Scattered showers and thunderstorms will develop over Southern California Monday afternoon, with most of the rainfall over the mountains and deserts.
- · Scattered showers and thunderstorms will move across the entire region Tuesday and Wednesday.
- Most mountains and desert locations will receive between 1 and 2 inches of rainfall and most coastal and valley locations will receive between a
 quarter inch and an inch of rainfall Monday afternoon through Wednesday night.
- · Scattered showers will remain possible over the Sierra late next week.
- Temperatures will become well below normal Tuesday through the end of next week.
